

BEFORE THE DAY

Set up your golf day.

1 Create the tribe.

From your dashboard, start a new tribe.

2 Add members from your contacts.

Open your tribe's members and tap the add button.

3 Invite the golfers who are not on SwingTribe yet.

Picking a contact who has no account creates an invitation instead, and they get a WhatsApp message carrying a code that joins them straight to your tribe.

4 Create the tournament.

From the tribe, create a tournament and pick the type: Standard Tournament for a normal event, Order of Merit to feed your season standings, Inter Tribe Match to play another tribe, or Sponsored Golf Day for an event with partners.

5 Add your sponsors.

In the tournament's settings, open the Sponsors section and tap Add Sponsor.

Also in the app under Help and Support.

THE FIELD AND THE DAY

Tee sheet, then play.

6 Add hole prizes and challenges.

Tap Add Hole Competition to put a prize or a challenge on any hole.

7 Add the players and check their handicaps.

Invite your tribe, share the tournament link or QR code, or register guests.

8 Generate and publish the tee sheet.

Set Group Size, Start Time and Interval (minutes), then tap Generate Tee Sheet.

9 Check who has actually joined, and let the reminders do the chasing.

Anyone you added by phone has a profile waiting to be claimed, and until they sign in with that number they play off a handicap worked out from the rest of the field.
